education

2003–2010 **Masters** in Informatics and Computing Engineering FEUP, Universidade do Porto
Classification: 14 out of 20 (fourteen out of twenty)

Link Ecosystem of the Portuguese Blogosphere

This thesis explored the blogosphere as an ecosystem of blogs comprised not only of a set of posts and their individual content, but also of the interactions established through the hyperlinks connecting the posts. Based on this study, we discovered a correlation between the blog's centrality and the length and number of posts.

Thesis Classification: 18 out of 20 (eighteen out of twenty)

2000–2003 **Technological Specialization** in Informatics Colégio de Gaia
Classification: 18 out of 20 (eighteen out of twenty)

experience

2015–2016 **LABORATÓRIO DE SISTEMAS DE INFORMAÇÃO/U.PORTO** Porto, Portugal
Researcher / Developer

Research and development of an entity-oriented search engine. Particularly focused on query analysis methodologies, as well as the construction of specialized indexes and ontologies for efficient and effective question-answering through contextual widgets. The produced system was also aimed at providing a platform able to support the academic community with the experimentation of search engines backed by linked data.

2014–2015 **INTERRELATE** Porto, Portugal
Software Engineer / Data Scientist

Data Science:

- Collection and analysis of several types of data, mainly originating from the web, particularly from social media.
- Highly proficient in R, Python and SQL (from data collection to reporting), including topic tracking, outlier and anomaly detection, statistical smoothing, regression, classification, clustering and network analysis.
- Skilled in dynamic reporting.
- Developed several data visualization widgets.
- Analyzed social networks and other graphs.

Software Engineering:

- Software design of web applications and analytics pipelines.
- Technology evaluation and selection.
- Supporting the team with new technologies or languages.
- INTERRELATE Backoffice:
 - Devising strategies for automatic and periodical data collection and information extraction from unstructured user-generated content;
 - Systems integration, including team coordination (4 person project).

Programming:

- Worked in nearly every company project, using various different languages.
- Developed several web applications and web services.
- INTERRELATE Backoffice:
 - Web crawler development;
 - Development of data visualization widgets for internal statistics;
 - Front-end design and development.

Sysadmin:

- Manage the company servers, including security, backups and product deploys.
- Maintain firewall rules and SMTP server.
- DNS configurations (including SPF, for SPAM control).
- Nginx configurations.
- Company services maintenance (internal and external).
- Log monitoring and bug reporting.
- Real-time e-mail log error monitoring for critical systems and web service mobile monitoring for downtime or connection issues.
- Support Ticket System configuration.
- PayPal payment services.

2012–2013	LABORATÓRIO SAPO/U.PORTO <i>Researcher / Developer</i> Research and development of music discovery and recommendation techniques supported on a graph-based neighborhood approach, as well as on latent factor models based on matrix factorization algorithms. Development of methodologies to combine knowledge from different dimensions, including not only user profile, content and context features, but also social features, such as community structure. Related tasks required work on data mining, multimodal network analysis and community detection, and information retrieval.	Porto, Portugal
2011–2012	CRACS/INESC TEC <i>Researcher / Developer</i> Enhancement, adaptation and implementation of state of the art algorithms for network analysis, data mining and data visualization, in the context of intelligent information systems for cyber journalism, as part of the Breadcrumbs Project (UTA-Est/MAI/0007/2009).	Porto, Portugal
2010–2011	LABORATÓRIO SAPO/U.PORTO <i>Researcher / Developer</i> Work in the areas of data mining, network analysis, community detection, information retrieval, real-time data analytics and data visualization.	Porto, Portugal
2002–2003	NÚCLEO PORTUGUÊS DE FREEBSD <i>Documentation / Programming</i> Translation of the official FreeBSD documentation to portuguese, creation of how-to guides in portuguese, porting open source applications to FreeBSD and programming and content management of the hint subsystem.	Coimbra, Portugal

awards

2012	Certificate of Merit The 2012 IAENG International Conference on Data Mining and Applications Awarded to the best papers published in the conference.
------	----------------------------------------------------------------------------------------------------------------------------------------------------------------

communication skills

2013	Oral Presentation	DEI-FEUP
	Did a short presentation on the Juggle project for the department, in the context of DEI Talks.	
2013	Oral Presentation	SAPO
	Presented the Juggle project, including the developed graph-based recommendation algorithms, for the SAPO technical team.	
2012	Oral Presentation	International Conference on Knowledge Discovery and Information Retrieval
	Presented an interactive news clips visualization tool for applications in journalistic research and knowledge discovery.	
2012	Oral Presentation	IAENG International Conference on Data Mining and Applications
	Presented a methodology, based on community detection in multidimensional networks, for the creation of news context from a folksonomy of web clipping.	
2011	Poster	International AAAI Conference on Weblogs and Social Media
	Presented research work on using the h-index to estimate blog authority.	
2010	Oral Presentation	Laboratório SAPO/U.Porto
	Presented Ciclope project for the Portugal Telecom's CEO and the media, as part of the inaugural presentation of Laboratório SAPO/U.Porto.	
2010	Poster	KDD Workshop on Social Media Analytics
	Presented the blog popularity study conducted during my Masters degree.	

interests

professional: search engines, data analysis, social network analysis, community detection, web development, algorithms and data structures for low level information manipulation, visualization
personal: music, television, guitar, cooking

additional information: Please check out my personal website, where I've shared some of my research output: <http://josedevezas.com/#/research#publications>
